

Literatuurlijst

- Andriuzzi, W. S., Pulleman, M. M., Schmidt, O., Faber, J. H., & Brussaard, L. (2015). Anecic earthworms (*Lumbricus terrestris*) alleviate negative effects of extreme rainfall events on soil and plants in field mesocosms. *Plant and Soil*, 397(1-2), 103-113.
- Briones, M. J. I., & Schmidt, O. (2017). Conventional tillage decreases the abundance and biomass of earthworms and alters their community structure in a global meta-analysis. *Global Change Biology*, 23(10), 4396-4419.
- Ferlian, O., Eisenhauer, N., Aguirrebengo, M., Camara, M., Ramirez-Rojas, I., Santos, F., et al. (2017). Invasive earthworms erode soil biodiversity: A meta-analysis. *Journal of Animal Ecology*, 1-11.
- Frelich, L. E., Hale, C. M., Scheu, S., Holdsworth, A. R., Heneghan, L., Bohlen, P. J., et al. (2006). Earthworm invasion into previously earthworm-free temperate and boreal forests. *Biological Invasions*, 8(6), 1235-1245.
- Hastings, A., Byers, J. E., Crooks, J. A., Cuddington, K., Jones, C. G., Lambrinos, J. G., et al. (2007). Ecosystem engineering in space and time. *Ecology Letters*, 10(2), 153-164.
- Keith, A., & Robinson, D. (2012). Earthworms as natural capital: Ecosystem service providers in agricultural soils. *Economology Journal*, 2(2), 91-99.
- Korthals, G., Berg, M. P., de Goede, R., Beijaert, M., & Rienks, F. (2015). Bodemdierenkaart. Te vinden op <https://nioo.knaw.nl/sites/default/files/downloads/DE%20BODEMDIERENKAART%202015.pdf>.
- Lubbers, I. M., van Groenigen, K. J., Fonte, S. J., Six, J., Brussaard, L., & van Groenigen, J. W. (2013). Greenhouse-gas emissions from soils increased by earthworms. *Nature Climate Change*, 3(3), 187-194.
- Rutgers, M., & Dirven-van Breemen, L. (2012). Een gezonde bodem onder een duurzame samenleving Bilthoven: RIVM.
- van Groenigen, J. W., Lubbers, I. M., Vos, H. M. J., Brown, G. G., De Deyn, G. B., & van Groenigen, K. J. (2014). Earthworms increase plant production: a meta-analysis. *Scientific Reports*, 4.
